THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on 06/03/08 has been fully considered and entered.

Reasons for Allowance

2. Claims 1, 5-7, 9-13, 15-16, 19-22, 24-30, 32 and 33 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest all the limitations of claim 1. Specifically, the prior art fails to disclose a wavelength selective optical switch comprising a polarization transformation device receiving input light having a plurality of wavelength components and outputting light of a predefined polarization; a beam expanding device for expanding the light of predefined polarization in a predetermined plane; a first dispersive element receiving the expanded light of predefined polarization, and dispersing wavelength components of the expanded light of predefined polarization in the predetermined plane; a polarization conversion element receiving the dispersed wavelength components of the expanded light of predefined polarization, the polarization conversion element being pixelated generally along the direction of the dispersion such that separate pixels are associated with separate wavelength components of the expanded light, and at least one pixel of the polarization conversion element being operative to convert the polarization of light, passing through the pixel according to a control signal applied to the pixel; a second dispersive element receiving

Art Unit: 2874

light from the polarization conversion element, and operative to combine the separate wavelength components of the light into multi-wavelength output light; a beam compressing device aligned such that the multi-wavelength output light is compressed in the predetermined plane; and a polarization selective device receiving the compressed multi-wavelength output light, the polarization selective device being aligned such that only those components of the multi-wavelength output light having a predetermined polarization are transmitted therethrough.

Claims 5-7, 9-13, 15, 16 and 19-21 depend from claim 1.

The prior art of record also fails to disclose or reasonably suggest all the limitations of claim 22. Specifically, the prior art fails to disclose a wavelength selective optical switch comprising a polarization transformation device receiving input light having a plurality of wavelength components and outputting light of a predefined polarization; a beam expanding device for expanding the light of predefined polarization in a predetermined plane; a dispersive element receiving the expanded light of predefined polarization, and dispersing wavelength components of the expanded light of predefined polarization in the predetermined plane; a polarization conversion element receiving the dispersed wavelength components of the expanded light of predefined polarization, the polarization conversion element being pixelated generally along the direction of the dispersion such that separate pixels are associated with separate wavelength components of the expanded light, and at least one pixel of the polarization conversion element being operative to convert the polarization of light passing through the pixel according to a control signal applied to the pixel; and a reflective surface

Art Unit: 2874

disposed in proximity to the polarization conversion element such that light is incident thereon after passing through the polarization conversion element, and is reflected back through the pixel of the polarization conversion element.

Claims 24-29 depend from claim 22.

The prior art of record fails to disclose or reasonably suggest all the limitations of claim 30. Specifically, the prior art fails to disclose a wavelength selective optical switch comprising a dual fiber collimator inputting a fiber optical signal having a plurality of wavelength components, and outputting the signal as light having a plurality of wavelength components; a first polarization transformation device receiving the light output from the dual fiber collimator, and outputting the light with a predefined polarization; a beam expanding device for expanding the light of predefined polarization in a predetermined plane; a dispersive element receiving the expanded light of predefined polarization, and dispersing wavelength components of the expanded light of predefined polarization in the predetermined plane; a first reflecting surface directing the dispersed wavelength components of the expanded light of predefined polarization through a polarization conversion element, the polarization conversion element being pixelated generally along the direction of the dispersion such that separate pixels are associated with separate wavelength components of the expanded light, and at least one pixel of the polarization conversion element being operative to convert the polarization of light passing through the pixel according to a control signal applied to the pixel; a second reflective surface disposed such that the wavelength components of the light of generally linear polarization, after passage through the polarization

Art Unit: 2874

conversion element, are directed back through the beam expansion device and the dispersive element, the dispersive element combining the separate wavelength components of the output light into multi-wavelength output light; and a second polarization transformation device aligned such that that part of said multi-wavelength output light having the predetermined polarization is transmitted therethrough and is output from the switch through the dual beam collimator.

Claims 32 and 33 depend from claim 30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
